

Two-sided Applicator

The U shaped-Type Two-Sided Applicator is made using modern technology of metallurgy with a precision grinding machine. The accuracy of the gap depth is $\pm 1.0\mu\text{m}$ (50 μm and below) and or 2% of Full Scale. It is designed with ASTM D 823-25

It is made of high-grade, corrosion-resistant stainless steel 440C.

Main Technical Parameters:

- ★ Wet Film Width of: 80mm
- ★ The total length: 100mm

★ Ordering Information:

BGD 202/1: (25 μm , 50 μm)

BGD 202/2: (75 μm , 100 μm)

BGD 202/3: (150 μm , 200 μm)

BGD 202/4: (300 μm , 400 μm)

Biuged accepts any order for customized special applicators!
